

# Project Profile

## 2006 Denver Parade of Homes “Circle of Life” Home

### Bayseal™ CC Closed-Cell Insulation

<b>Project Name:</b>	Denver Parade of Homes “Circle of Life” Home
<b>Builder:</b>	Rocky Mountain Custom Homes Denver, CO
<b>Spray Foam Contractor:</b>	Mark One Insulation Castlerock, CO
<b>Insulation System:</b>	Bayseal CC Closed-Cell Foam Insulation

### Project Overview:

The Denver Parade of Homes is an event hosted annually by the Home Builders Association of Metro Denver. The event features multiple homes each built to employ and exhibit the latest trends, technology, design, and architectural innovations in residential construction.

The “Circle of Life” Home, is one of seven homes built for the Denver Parade of Homes and is considered “Cutting Edge Contemporary” in style by Architects, Vaughn and Associates, as well as builder, Rocky Mountain Custom Homes.

Contractor Mark One Insulation applied Bayseal CC spray polyurethane foam to wall cavities and the underside of the roof deck of the “Circle of Life” Home. The closed-cell structure of Bayseal seals off the building envelope eliminating air infiltration and exfiltration while maintaining a high R-value.

The “Circle of Life” home received the Built Green® Colorado Award of Achievement. This award is granted to homes that meet criteria specified by Built Green Colorado for improved energy-efficiency, durability, reduced maintenance and better indoor air quality and sustainability.
